

NRS Social Work Services: Teamwork matters

For over 30 years, NRS has provided a full range of rehabilitation services to adults and children with serious injuries or disabilities. Our experienced Social Workers are key members of the team.

Individuals with injuries including brain or spinal cord injuries, orthopedic injuries, burns, amputations, chronic pain and psychological disorders have complex physical, cognitive, emotional and behavioural challenges. These individuals often require support from a Social Worker with extensive experience working with individuals with complex needs and working as part of a multi-disciplinary team.

Individual, Couple and Family Counseling are offered in the home and our clinic. We also offer virtual treatment.

Working closely with the medical and rehabilitation team, employer, teacher, insurer and legal representative, our experienced Social Workers provide:

- A comprehensive assessment of the client's life situation, mental health and relationships.
- Client and family education to support informed decision making in the rehabilitation process.

- Counseling to clients and families to help them adjust to changes after injury or accident. This will include helping them identify and understand the source of stress or difficulty, to learn more about their condition, to develop coping skills and to find effective solutions to the problems impacting their daily lives, relationships and quality of life.
- Help to access other public and private social and financial supports in their in their community.

Let our caring and competent team show you that there is indeed a world of possibilities!

NRS has been providing home, work, school and clinic based rehabilitation services to adults and children with brain injuries, spinal cord injuries, orthopaedic injuries, burns, amputations, psychological/psychiatric disorders and other complex injuries for over 30 years. We have helped thousands of people to successfully rebuild their lives.
