

NRS Occupational Therapy Services: Teamwork matters

For over 30 years, NRS has provided a full range of rehabilitation services to adults and children with serious injuries or disabilities. Our experienced Occupational Therapists are key members of the team.

Individuals with injuries including brain or spinal cord injuries, orthopedic injuries, burns, amputations, chronic pain and psychological disorders have complex physical, cognitive, emotional and behavioural challenges. These individuals require support from an Occupational Therapist with extensive experience working with complex needs as part of a multi-disciplinary team. Functional goals may include becoming more independent, caring for your family and your home, engaging in fitness, sport leisure and social activities, and achieving success at work or school.

In person assessment and treatment is provided in the home, community, workplace and school, as well as at our clinic. We also offer virtual assessments and treatment.

Working closely with the medical and rehabilitation team, employer, teacher, insurer and legal representative, our experienced Occupational Therapists provide:

- A comprehensive assessment of the person's physical, cognitive, emotional and behavioural status, as well as their function in the area of self care, homemaking, caregiving, fitness/sport, social and leisure, work and academic pursuits.
- Client and family education to support informed decision making in the rehabilitation process.
- Treatment that may include skill development, pain management, sleep hygiene, pacing and other compensatory strategies, adaptive equipment, home renovations and arranging for supports such as attendant care and homemaking.

Let our caring and competent team show you that there is indeed a world of possibilities!

NRS has been providing home, work, school and clinic based rehabilitation services to adults and children with brain injuries, spinal cord injuries, orthopaedic injuries, burns, amputations, psychological/psychiatric disorders and other complex injuries for over 30 years. We have helped thousands of people to successfully rebuild their lives.
